Britain and the US have committed a crime against humanity of immense proportions in invading and occupying Iraq, causing the deaths of hundreds of thousands of Iraqi people and annihilating the integrity of that country. It is incredible that in their criminal arrogance they are carrying out provocations against Iran arresting Iranian diplomats and citizens in Iraq and taking them hostage, attacking Iran for excercising their right to have nuclear power and

creating border incidents knowing that Iran will and has every rigtht to defend its sovereignty.

It is hard not to come to the conclusion by the facts and by track record of the Bush and Blair and their other ministers that these provocations against Iran have been carefully orchestrated and planned. Regardless of whose waters the British marines were in the government has no regard for the sovereigty of Iraq, or any other country and should get out of the Middle East and all the other countries it presently occupies. Neither has the British government any regard for how it treats the people it captures parading them in hoods, bound hand and foot with flex, a government condemned the world over along with the US for its inhuman treatment of prisoners and disregard for the Geneva convention on prisoners of war.

South Tyneside Stop the War Coaltion condemns these threats and provocations against Iran and the massive military excersice of the US in the Persion Gulf and its continued occupations in the region.

These events make it even more imperative for the British people to bring into being an anti-war government and reiterate the right of countries such as Iran to defend their sovereignty.

Bring all the troops home from foreign soil!

End the attack on humanity!
