2010 is the Year of the next General Election. South Tyneside Stop the War Coalition is to host a discussion with Roger Nettlehip a worker politician who is standing *For An Anti-War Government* in the South Shields constituency. Other genuine anti-war candidates will be invited, including Shirley Ford Green Party. These candidates will be standing against David Miliband MP who deceived the people of South Shields when he said in the Gazette; "My bottom lines are that the government acts in accordance with international law" then he voted for the illegal invasion of Iraq.

There is the heartache and mourning of hundreds of soldiers' families in Britain and countless many hundreds of thousands families of those killed and maimed by the Anglo US "war on

PTO

terror". And there is the truth that the spin put out by the big parties and media that this is a "war on terror" is the biggest lie. That it is not to "defeat terrorism" but it is for the global interests and super profits of the few. The Big Party system forms a cartel for Pro-war government turning the youth of the nations of Britain into cannon fodder for these super profits. These parties represent the interests of a handful of reactionary captains of finance and industry that try to impose monopoly dictate on Britain and the world. They are wrecking and destroying public services and social programmes in Britain and are the cause of wars and conflicts abroad.

The issue facing the people of Britain as well as other countries is how to stop this carnage now and bring all troops home from foreign soil. The vision that inspires us is that another world is possible and necessary and that it is up to us to create it. A world where the people of our countries and communities of, Scotland, Wales and England make the decisions. Where we have control over foreign policy to withdraw Britain from the aggressive military alliances with the United States, NATO and others and to resolve international conflicts through peaceful means. Where international law is upheld which forbids war and the invasion of sovereign countries as a crime against the peace. A world where we take a stand against the racism of the British state and its Party system that promotes racism and racist parties. Where no one is illegal and where everyone has rights because they are human beings. This means the rights of *ALL* are upheld and defended and racism which was created by British colonialism has no place to hide in the modern world. It means an end to monopoly dictate over society and where public right is upheld over monopoly right. It means a pro-social programme that upholds the dignity of labour and recognises that it is the working class and people that are the producers of all the wealth and services in society and it is they that should be empowered to decide the direction of the economy and society.

The fight for an anti-war government has started. We call for the people to make preparations to block the plans to elect another pro-war government. Contact us now. Join in the Fight For an Anti-War Government and support our anti-war candidate and other genuine anti-war candidates.
